

EMT-Systems is the largest and most extensive technical training centre in Poland, located in Gliwice, Silesia, in the direct neighbourhood of Silesian Technical University.

It specializes in organizing practical courses for engineers and technical staff in the following areas:

- Systems of control and visualization
- Industrial robots
- Siemens PLM
- Mechanical Engineering
- Machinery Safety
- Material Engineering
- Production Optimization
- Production Quality

The concept of Industry 4.0 is implemented in the training programmes which is also reflected in the modern equipment. The centre provides standard and tailor-made trainings, conducted in either one of the 25 fully-equipped laboratories or the client's premises. The company hires 42 employees and cooperates with nearly 100 experts in various industrial areas. It has trained over 39,000 people since 2006.

Some of the awards:

- 2018 Golden Statue of Polish Business Leader,

- 2018 Innovation Laurel,
- 2017 and 2018 European Medal (for Plastics and Industrial Robots trainings),
- Training Company of the Year 2017, 2016 and 2014.

EMT-Systems also organizes free monthly specialized workshops under the name EMT TOUR. These events are an opportunity to find out about the latest technological developments, state-of-the-art gear and equipment, as well as a chance to update one's knowledge on production and maintenance.
