

Our company specializes in developing chemical-based raw materials for producers of various branches of Polish industry, including the composites, plastic, rubber, dyeing, paint.

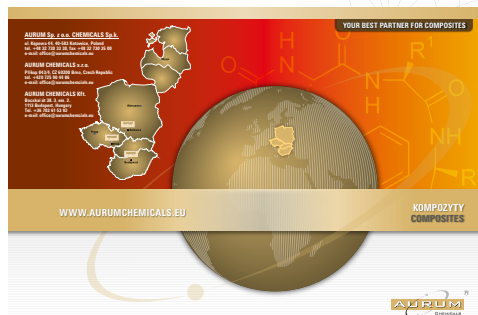

We are the sole distributor of chemical-based raw materials sourced from the largest producers in the world.

We guarantee you access to a wide range of high-grade products, professional consultancy and services, all designed to fit your needs.

Our specialists will help you select the most appropriate raw materials, as well suitable replacements for products you already use. Thanks to our close cooperation with reliable shipping companies, our goods are always delivered on time.

If you have any further questions, please feel free to contact us.
