

BELLA

Our company has over 30 years of experience in the manufacturing of tooling and elements made of composite.

We offer the full technological cycle of production including:

- the preparation of tooling (models and moulds),
- serial production (product lamination, finishing and varnishing).

We apply advanced technologies and materials. Models are made using numerical milling machine 5-axes. We have partnerships with numerous reputable companies from the rail, boatbuilding, automotive, and advertising industry.

ISO 9001:2015 and ISO 14001:2015 standards are implemented in our company. We also have a bonding certificate in accordance with DIN 6701
