

Elipsa design office deals with activities in the field of designing industrial design, small architecture, vehicles, everyday objects. The office also deals with architectural design and construction services from simple residential buildings to industrial facilities. In addition to design services, we also deal with hand-drawing and design training.

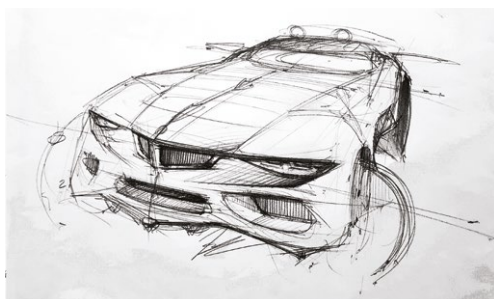

The studio is made up of architects and designers with many years of experience and academic titles, working as lecturers Dariusz Kronowski | Sandra Kronowska.

In the field of industrial design, we carry out urban infrastructure projects and projects for the arrangement of motor vehicles and others. We are a versatile workshop with a perfect hand-drawing workshop and computer software skills. We have the software and hardware that allows you to freely manipulate projects.

We can make elements from natural materials such as wood, stone, concrete, bamboo and modern materials such as composites, laminates and others.

We invite you to cooperate and create with our studio a modern, comfortable, aesthetic world tailored to the requirements of the 20th-century man.
