

MAZUR Sp. z o. o. is the leader in the field of production high-quality liners and renovation of sanitary sewage systems, using cured-in-place pipe (CIPP) trenchless technology in Poland.

Our company has been operating on the Polish market since 1992. Development of the company in the trenchless renovation of sanitary sewage systems has been continued since 2000, when we carried out the first trenchless pipe repair using the fibre liner impregnated with polyester resin.

Currently, we offer two types of liners:

- **MAZUR LINER I** – impregnated fibreglass composite cured by steam
- **MAZUR LINER UV** – impregnated fibreglass cured with UV rays

Many years of experience in the trenchless renovation industry, highly quali-

fied staff, modern production base with specialised equipment at the European standard level, as well as close cooperation with R&D centres let us continuously enhance customer satisfaction and in-

crease our market competitiveness. The company's long term goal is to maintain high quality services while respecting the principles of environmental protection. Since 2018 Mazur Sp. z o.o. is part of the BLEJKAN S.A. capital group.
