

# RymaTex®

Rymatex Sp. z o. o. has existed since 2002 and it is acting in the abrasives sector, supplying the highest quality products with very good technical and processing parameters, made using glass fibres obtained from leading European and global manufacturers and meeting strict requirements resulting from the technological regime.

Currently, the company manufactures:

- Technical textiles made of glass rowings (multiaxial woven fabrics, carbon, complex reinforcements–combimats, stitch mats, chopped core mat).
- Coated fiberglass mesh and discs.
- Substrates for lamelles.

- Glass nets coated phenol-formaldehyde impregnate, so-called prepreg. Used as reinforcement for abrasive discs.
- Flow materials in various combinations: CSM+PP+CSM, WR+PP+CSM.

The reliability of the company is confirmed by the fact that Rymatex has received many awards for enterprises that satisfies the most demanding customers needs.
