

NEW ERA MATERIALS

New Era Materials is a producer of patented one-component powdered epoxy resins (NEMResin), snap – cured epoxy prepregs (NEMPreg) pick and place transfer to a press type, high quality multi-material composite structures and finished products as well as 3d printed parts in SLS technology dedicated to serve our IV pillar strategy:

- ▶ sport and health,
- ▶ building and construction,
- ▶ mobility including public transport, automotive and aerospace.

Composites repair

Our new solution, introduced at the JEC World: composite panel with electronic integration that we believe is the answer for the market needs.

Tailor-made customer approach with the flexibility of materials used makes us a materials solution company, makes us a NEW ERA MATERIALS.
