

**POLON-IZOT** is an innovative manufacturing company, continuing the business activities of the world-known company P O L O N, established in 1956. We have over 600 installations worldwide. We are proud of our 60+ years of technical experience. Our strategy is to be a provider of new technology and innovation to measurement (basis weight, thickness, width, moisture) and solve technical issues of our customers.

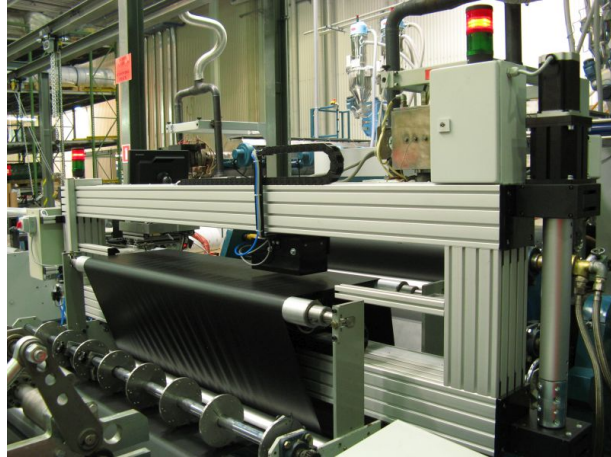

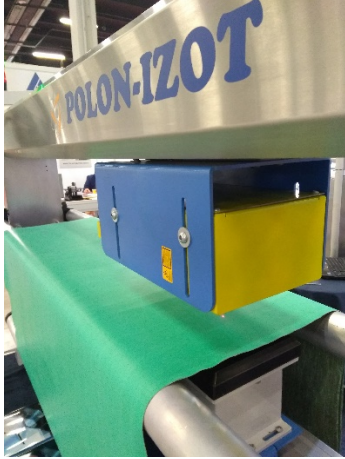

POLON-IZOT provides measuring, control, and automation systems for industry sectors like film, plastics, textile, nonwoven, paper, wood, and composite materials. Our long experience in narrow specialization allows us to reduce production costs, which gives our products a competitive price. **Measure& SAVE!**

#### **Our main products:**

- Industrial thickness and grammage on-line x-ray, isotopic, laser gauges
- Laboratory thickness and grammage gauges
- Industrial density and concentration gauges
- Radiation monitoring system- dosimetric vehicles gate
- Air radiation monitor
- Radionuclide contamination meter
- On-line ash contamination signaling monitor
- Dosimetric gauge for closed areas

- Industrial and laboratory XRF Spectrometers
- Industrial dust meters
- Industrial level gauges
